Story of a Sociopath HarperTeen
Hurt people hurt people. Say there was a novel in which Holden Caulfield was an alcoholic and Lolita was a photographer's assistant and, somehow, they met in Bright Lights, Big City. He's blinded by love. She by ambition. Diary of an Oxygen Thief is an honest, hilarious, and heartrending novel, but above all, a very realistic account of what we do to each other and what we allow to have done to us.

Confessions Of An English Psychopath Blurb
In 1974, Dennis Lynn Rader stalked and murdered a family of four in Wichita, Kansas. Since adolescence, he had read about serial killers and imagined becoming one. Soon after killing the family, he murdered a young woman and then another, until he had ten victims. He named himself “B.T.K.” (bind, torture, kill) and wrote notes that terrorized the city. He remained on the loose for thirty years. No one who knew him guessed his dark secret. He nearly got away with his crimes, but in 2004, he began to play risky games with the police. He made a mistake. When he was arrested, Rader’s family, friends, and coworkers were shocked to discover that B.T.K. had been among them, going to work, raising his children, and acting normal. This case stands out both for the brutal treatment of victims and for the ordinary public face that Rader, a church council president, had shown to the outside world. Through jailhouse visits, telephone calls, and written correspondence, Katherine Ramsland worked with Rader himself to analyze the layers of his psyche. Using his drawings, letters, interviews, and Rader’s unique codes, she presents in meticulous detail the childhood roots and development of one man’s motivation to stalk, torture, and kill. She reveals aspects of the dark motivations of this most famous of living serial killers that have never before been revealed. In this book Katherine Ramsland presents an intelligent, original, and rare glimpse into the making of a serial killer and the potential darkness that lives next door.

Mind control is a tool that one can use for good or evil purposes. It all depends on the type of mind control that is involved and the intent of the individual who wants to apply it. It also depends on whether the target or subject of mind control will benefit from it or is harmed. Nonetheless, mind control is a very intriguing and fascinating topic. The majority of us use some form of mind control such as persuasion or manipulation in our everyday lives to get what we want from others and to achieve our goals. Some of us even have used the mind control technique of self hypnosis on ourselves for self improvement in the areas of weight loss, reducing stress levels, or eradicating bad habits such as smoking from our lives. Mind control is a vast subject that has many components and factors to it and to get the proper understanding of it and the many techniques that are involved, it must be examined and explored in great detail. Confessions of a Sociopathic Social Climber
Camden House
Most people are both repelled and intrigued by the images of cold-blooded, conscienceless murderers that increasingly populate our movies, television programs, and newspaper headlines. With their flagrant criminal violation of society's rules, serial killers like Ted Bundy and John Wayne Gacy are among the most dramatic examples of the psychopath. Individuals with this personality disorder are fully aware of the consequences of their actions and know the difference between right and wrong, yet they are terrifyingly self-centered, remorseless, and unable to care about the feelings of others. Perhaps most frightening, they often seem completely normal to unsuspecting targets--and they do not always ply their trade by killing. Presenting a compelling portrait of these dangerous men and women based on 25 years of distinguished scientific research, Dr. Robert D. Hare vividly describes a world of con artists, hustlers, rapists, and other predators who charm, lie, and manipulate their way through life. Are psychopaths mad, or simply bad? How can they be recognized? And how can we protect ourselves? This book provides solid information and surprising insights for anyone seeking to understand this devastating condition.

M. E. Thomas is a high-functioning non-criminal sociopath. She is charismatic, ambitious and successful. You would be charmed by her if you met her, might even be seduced by her. You would not realise that she is studying you to find your flaws, that she is ruthlessly manipulative, has no empathy and does not feel guilt or remorse. But she does like people - she likes to touch them, mould them and ruin them. She could be your friend or your boss. She could be you . . . Now she writes with breathtaking honesty about her life. She also draws on the latest research to explain why at least one in twenty-five of us are sociopaths - and shows why that's not a bad thing. By turns fascinating, shocking and funny, Confessions of a Sociopath is a gripping insight into the mind of a self-confessed predator.
